

Test on Grass on Round About, Kuwait, August 2011

Round About, End July 2011
Prepared for the Test (see red split line).

“Imagine that we started the experiment in August where the heat reached 45 degrees Celsius in the night.”

**Dry and sandy patches, grass roots
still living**

Some areas without grass, completely dry

Road sides are suffering

4 weeks later, after 3 sprayings of
ALGIFOL diluted 1:1000

“ALGIFOL AMAZING PRODUCT,
INCREDIBLE RESULTS”

“I am sending some new photos taken today (01.09.11), it shows that our part become green and the second part which was more green than ours upon starting the experiment it become pale (yellow).”

Documentation and test done by Mr. Amin Habib and the engineers from the agricultural authority, Kuwait.

Organic certified ALGIFOL was used as per instructions of Neomed Pharma GmbH, producers from Germany.
